

# ACCOUNTING, AAS

Contemporary business depends on the ready availability of financial information and analysis. The Associate of Applied Science in Accounting degree provides students with knowledge and the skills necessary for employment and growth in the accounting profession. Accounting is known as the language of business and students will use that language to create and analyze, process, and communicate essential information about financial operations. The program level objectives for students completing the AAS in Accounting are as follows:

1. Demonstrate fundamental knowledge and application of business concepts with emphasis on bookkeeping and accounting
2. Identify and research a specific academic/career area of accounting to focus their futures
3. Analyze current issues in accounting, evaluate evidence and construct a written report, and deliver an oral presentation detailing the outcomes of the analysis
4. Develop a career plan to secure an appropriate, entry-level position relevant to their study or be eligible for bachelor-level study
5. Illustrate effective utilization of technology solutions relevant to employers
